LAST NEWS: OZONE AND COVID19

Posted on 6 Apr 2020 in News WFOT

Three more trials are going on in Tinjian Huanju Hospital. We only have a preliminary report of the first two cases. Another trial is waiting for approval in Italy and two more trials are

being prepared in Portugal and Brazil, all last three with WFOT's help. We hope that last trials are approved and we soon get data enough to help our patients. WFOT will not publish preliminary protocols or data without permission from the trial's coordinator unless it is required by health authorities. Meanwhile, we must follow STRICTLY the advises from these authorities.

UPDATE – 27/03/2020

The Italian trial, under the auspices of Nuova FIO, has been [authorized officially](#) by the Ethic Committee of Sapienza University... soon we could see the progress [here](#).

Other trials have been accepted in hospitals of Romania and Turkey and are pending their ethic committees' final approval.

UPDATE – 28/03/2020

Other trial promoted by NuovaFIO has already started in Poliambulanza Institute Hospital Foundation in Brescia after approval of its Ethic Committee. It also pending of registration in the web of Clinical Trials.

UPDATE – 06/04/2020

The University Hosptial Santa Maria della Misericordia in Udine – Italy has done a pilot study under the approval of the hospital's ethic committee. They obtained very positive results in 35 of the 36 patients treated, reducing the intubation rate from 15% to 3%. They have applied for approval from Spallanzani Institute in Rome to start a randomized clinical trial.
